

## Orezone Bomboré Project Reaches Another Permitting Milestone

**June 13, 2016** – Orezone Gold Corporation (ORE: TSXV) is pleased to announce that it has successfully completed a presentation and critical technical review of its Bomboré Gold Project with the Burkina Faso National Commission of Mines (“NCM”)<sup>1</sup>. The NCM reviewed the project’s feasibility study, including an environmental assessment and impact study, and a relocation action plan. The Company has now fulfilled all the conditions set by the NCM and was advised that the NCM will issue a favorable and binding opinion with respect to the Company’s application for a commercial mining permit. This was the last step in the permitting process before a final decision can be made by the Council of Ministers and decreed by the Government (at a full cabinet session) to grant a mining permit, which is expected during the third quarter of 2016.

### About Orezone Gold Corporation

Orezone is a Canadian company with a successful gold discovery track record and mine development experience in Burkina Faso, West Africa. The Company owns a 100% interest in Bomboré, the largest undeveloped oxide gold deposit in West Africa, situated 85 km east of the capital city and adjacent to an international highway. The Company has completed a Feasibility Study and received all environmental and critical approvals for the granting of a mining permit at Bomboré that is expected during the third quarter of 2016.
